Informed Consent for Central line Insertion

I, _____, ☐ the Patient, or ☐ (representative of patient _____), have (please tick the correct option above)

have read and been explained in a language that which I fully understand, that the patient requires **Central Line Insertion**.

Central Line Insertion -:

A central catheter is a long, thin, flexible, plastic tube that is inserted into a large, central blood vessel. A central catheter is used to deliver medication, nutrition, IV fluids, and chemotherapy. A central line can also be used to measure fluid volume status, and to help determine if a patient is dehydrated or has received an adequate amount of fluid to support bodily functions. Central lines usually go into the body in the center of the chest. The line is positioned under the skin, and inserted into a large vein by your collar bone/groin. The central line can stay in the vein for longer period as compared to a typical intravenous line.

The procedure of insertion may differ depending on the type of catheter and the insertion site. In general, the doctor will administer a local anesthetic, make a small incision over the skin. Use an x-ray / ultrasound / guide wire to guide the catheter into the vein using the guide wire. The wire is then removed & catheter line is secured using sutures & tapes. The insertion site is covered with a bandage. A chest x-ray can be taken to confirm its placement.

Intended benefits:

Access to venous circulation, to optimize fluids, to administer specific medications

Possible risks and complications:

Blood Stream Infection, Pneumothorax (Air around lungs) , Cardiac Tamponade (blood around heart)
Thrombosis (Clot Formation), Bleeding

Possible alternatives:

Peripheral venous cannula, Peripherally inserted central line.

I am now aware of the intended benefits, possible risks & complications, and available alternatives to the said procedure. I am aware that while majority of patients have an uneventful procedure and recovery, few cases may be associated with complications. I am also aware that results of any procedure can vary from patient to patient; and I declare that no guarantees have been made to me regarding success of the above procedure.

I also understand that this procedures may have to be performed more than once and has unique risks. I have had the opportunity to ask questions about the procedures listed and these questions have been answered to my satisfaction. I am also aware that I can withdraw my consent at any point of time at my own risk and consequence, by submitting the withdrawal in writing.

I am now also aware that during the course of these procedure the doctor will be assisted by medical and paramedical team, and that the doctor may seek consultation/assistance from relevant specialists if the need arises. I agree to observing, photography (still/video/televising) of the procedures (including relevant portions of my body) including my diagnosis/reports (pathology, radiology, etc.), for academic/ medical/medico-legal purposes, provided my / my Patient's

identity is not revealed by such acts. I also agree to my clinical details being shared for scientific publications provided my / my Patient's identity is not disclosed. I am also aware of the expected course after the procedure and the care to be provided, and understand that sometimes extension of duration of hospitalization may be required and/or there may be requirement of extra medicines or treatments, thereby leading to increase in the treatment expenses, depending upon the body's response to the treatment/procedure.

I give my consent voluntarily to the members of the ICU team for ICU admission and for carrying out **Central Line Insertion** that are integral to ICU admission on ☐ myself or ☐ my above named patient, being fully aware of the nature, potential risks and complications, intended benefits and possible alternatives.

I further declare that all fields (of this form) requiring insertion or completion were filled in my presence at the time of my signing this form. I, the above named Patient/named patient's representative, do further hereby declare that I am above 18 years of age as on the date of signing this form, mentally sound and am giving consent without any fear, threat or false misconception.
