|      | 10 PM |       |              |              |
|      | 12 PM |       |              |              |

RASS SCORING (Richmond Agitation-Sedation scale)

| Score | Term              | Description                                                                                    |
|-------|-------------------|------------------------------------------------------------------------------------------------|
| + 4   | Combative         | Overtly combative or violent; Immediate danger to staff                                        |
| + 3   | Very agitated     | Pulls on or removes tube (s) or catheter (s) or has aggressive behaviour toward staff          |
| + 2   | Agitated          | Frequent non-purposeful movement or patient-ventilator dysynchrony                             |
| + 1   | Restless          | Anxious or apprehensive but movements not aggressive or vigorous                               |
| 0     | Alert and calm    | Spontaneously pays attention to caregiver                                                      |
| - 1   | Drowsy            | Not fully alert, but has sustained (more than 10 seconds) awakening, with eye contact to voice |
| - 2   | Light sedation    | Briefly (less than 10 seconds) awakens with eye contact to voice                               |
| - 3   | Moderate sedation | Any movement (but no eye contact) to voice                                                     |
| - 4   | Deep sedation     | No response to voice, but any movement to physical stimulation                                 |
| - 5   | Unarousable       | No response to voice or physical stimulation                                                   |
